

How did we do?

Who came to the event:

What we heard:

“My favourite part was the diversity of topics and ability to meet individuals from a variety of clinical backgrounds and locations/authorities.”

“The presenters made a strong effort to include all health providers perspectives and patient perspectives.”

“Next time, we need fewer content streams or more time! I was only able to attend 4/16 sessions. Over 2 days I could do 8/16.”

“From the start to finish, my first experience as a PVN participant went very smoothly. The support and information were invaluable and greatly appreciated.”

Did SQAN DAY successfully achieve its goals?
