

Info Kit

World Sepsis Day 2019

Hello!

Thanks for supporting the **BC Sepsis Network** in promoting early recognition and treatment of sepsis in hospitals on World Sepsis Day (WSD), September 13. We invite you to join us and other organizations around the world in raising awareness of sepsis, and how rapid and timely interventions can reduce the risk of dying from the illness.

There are many ideas, inspiration and resources in this kit for you to share with your organization and help raise awareness for **Sepsis Awareness Week (September 11-15)** and **World Sepsis Day 2019 (September 13)**.

“I Survived Sepsis” Stories

Many people have had very personal encounters with sepsis; some stories end on a positive note, and some paint a picture of the difficult road that many sepsis survivors face. We believe that shared experiences contribute to valuable education for other patients, families and health care providers. Over Sepsis Awareness Week, visit the BC Patient Safety & Quality Council – which has created [BC Sepsis Network](#) – [website](#) to read sepsis survival stories.

Infographics

Print, email or share infographics highlighting different aspects of sepsis on your website or social media profiles to spread awareness about sepsis and World Sepsis Day:

Sepsis – What You Need to Know as a Patient – [Download](#)

SEPSIS
What You Need to Know as a Patient

What is Sepsis?
Sepsis is the body's extreme response to an infection. It is life-threatening and, without timely treatment, can rapidly lead to tissue damage, organ failure and, possibly, death.

Who is at Risk of Developing Sepsis?
Anyone can get an infection. Any infection can lead to sepsis.

- Anyone with a weak immune system
- Anyone with chronic illness
- Adults who are 65 years of age and older
- Anyone who receives treatments that involve insertion of medical objects into the body (like urinary catheters, intruding vascular lines and implanted devices)

What Are the Signs and Symptoms of Sepsis?
Think S.E.P.S.I.S.

S SHIVERING You might have chills, fever, clammy skin and feel like you have the flu.	E ELEVATED HEART RATE It might feel like your heart is racing.	P PAIN You might feel new or different pain or discomfort.
S SLEEPY You may feel confused, disoriented or like you have less energy than usual.	I "FEEL WORSE THAN EVER" You might be sick and worried that you are not getting better.	S SHORT OF BREATH You might feel out of breath or have trouble breathing.

Sample Newsletter Article

Here's a message about the campaign that you can include in your organization's communications:

Join the Fight against Sepsis

September 13 is World Sepsis Day, an opportunity for people worldwide to unite in the fight against sepsis, a disease which causes a death every 3.5 seconds, killing 8 million people every year. Early recognition and treatment reduces sepsis mortality by 50% ([World Sepsis Day, 2019](#)).

World Sepsis Day is a moment to increase public awareness and remind health care practitioners that there is an urgent need to increase and improve education and the quality of care. It's also an important occasion to show support and solidarity with those who have lost loved ones or, as sepsis survivors, suffer from long-term consequences of the disease.

There are many ways to support World Sepsis Day! Start by joining the [BC Sepsis Network](#) - a collaborative created by the BC Patient Safety & Quality Council, a highly visible member of the global sepsis community and early adopter of the new Centre for Disease Control sepsis resources. The Network connects physicians and nurses in the province to champion sepsis improvement locally, with the aim of reducing morbidity and mortality associated with sepsis.

Learn more about sepsis and how to identify the early symptoms in [this infographic](#), [download the World Sepsis Day toolkit](#), and use **#WorldSepsisDay** and **#StopSepsis** to spread the word about the disease. Read the surviving sepsis stories on the [BC Patient Safety & Quality Council website](#).

Visit the Sepsis Awareness booth at UBC Robson Square

On September 13, from 11:00 am to 6:00 pm, visit the Sepsis Awareness booth at UBC Robson Square (800-block of Robson Street) to learn about sepsis from health care professionals, researchers and survivors. [More information about the booth](#).

Twitter

Help us spread the word about sepsis on social media! Please feel free to share the infographics, use **#WorldSepsisDay** and **#StopSepsis**; and tag [@BCSepsis](#) and [@WorldSepsisDay](#) in your posts. Here are some suggestions:

September 13 is #WorldSepsisDay. Learn about the disease and download resources to spread awareness - together we can #StopSepsis! <https://www.worldsepsisday.org>

Sepsis causes a death every 3.5 seconds around the world. Early recognition and treatment reduces mortality. Learn to identify the symptoms to #StopSepsis. <http://ow.ly/vfIT50vMUTG> #WorldSepsisDay

Slurred speech, fever, muscle pain and breathlessness are some of the symptoms of #Sepsis. Early recognition and treatment improve chances of survival – together we can #StopSepsis!
<http://ow.ly/vfIT50vMUTG> #WorldSepsisDay

#Sepsis kills one person every 3.5 seconds. Knowing the symptoms and getting early treatment is crucial to increase chances of survival. Learn to recognize sepsis and help spread the word to #StopSepsis!
<https://www.worldsepsisday.org> #WorldSepsisDay

Interested in other sepsis-related social media accounts?

Follow [@BCSepsis](#), [@ActionOnSepsis](#), [@CICHinfo](#) and [@BCHresearch](#) for more information.

Facebook

You can add a WSD frame to your profile picture on Facebook. It's simple:

Go to your Facebook profile, click on your profile picture, click on "add frame" and search for the World Sepsis Day frame:

Photo Challenge

Take a picture of yourself or your team with one of the WSD infographics and share it on social media using the hashtag #WorldSepsisDay, or tweet the picture directly to [@BCSepsis](#) and [@WorldSepsisDay](#).

Email Signature

Add the following tagline to your email signature to help spread the word to your contacts:

September 13 is World Sepsis Day – Stop Sepsis, Save Lives

BC Sepsis Network Clinical Resources

Have you joined the BC Sepsis Network?

The [BC Sepsis Network](#) is a collaborative created by the BC Patient Safety & Quality Council to provide support for health care providers around BC to share resources, improve consistency of care, spread innovation and improvement ideas, and collaborate on change. [Join the Network](#) to stay up-to-date on sepsis care in BC!

The Inpatient Sepsis Toolkit

Provides BC inpatient hospital wards with information, resources and tools to successfully initiate, implement and spread best practices for sepsis across BC.

<https://bcpsqc.ca/improve-care/bc-sepsis-network/inpatient-units/>

BC Emergency Department Sepsis Guidelines

The guidelines help emergency departments offer the best sepsis care for patients across the province, reducing mortality.

<https://bcpsqc.ca/improve-care/bc-sepsis-network/emergency-departments/>

We appreciate your help with promoting World Sepsis Day and thank you for your valuable contribution in the fight against sepsis!

Please let us know if you require any further information or have any questions.
